

Differences in Election Day Procedures
Secretary of State On-line Training Program
Vs.
Franklin County Board of Elections
March 6, 2012 Primary Election

There are a few differences between procedures used in Franklin County, Ohio and those described in the Secretary of State's on-line training program. Please review the following before and after you take the on-line training program:

1. The FCBOE (Franklin County Board of Elections) does not require the Voting Location Manager (VLM) to contact all precinct election officials prior to Election Day. The FCBOE does not give out phone numbers of other precinct election officials.
2. The FCBOE encourages the Voting Location Manager to stop by their work location prior to Election Day. The VLM is NOT expected to set-up prior to Election Day but to survey the site prior to the election.
3. The FCBOE requires that all precinct election officials arrive at their work location by **5:30 a.m.** on election morning.
4. Voters **may request** a paper ballot at the March 6, 2012 Primary Election rather than vote on the voting machine.
5. The FCBOE does not require precinct election officials to run a zero opening tape in the morning.
6. The FCBOE Curbside Voting procedure is different than the procedure described in the Secretary of State (SOS) on-line training video. The FCBOE will provide a pink CURBSIDE VOTING envelope for the voter/poll workers to complete.
7. Please refer to the March 2012 Training Manual for Election Day procedures used in Franklin County, Ohio.
